1. GENERAL INFORMATION

a. System Overview

Wanda POS is a Point of Sale. It keeps track of all cash coming into or going out of a business by monitoring purchase of supplies and raw materials and sales of finished products. This system is extensible and suitable for all sorts of businesses, be them restaurants, stores, malls or supermarkets. It can be configured to meet the particular needs of the business in question.

ii. Coordination

This is a point of sale. Hence, Wanda POS on its own cannot perform any accounting operation. To get this ability to perform various accounting tasks [such as tracking profits and losses and providing business/managerial advice, predictions, etc.] Wanda POS works hand-in-glove with iDempiere. iDempiere is an ERP system which Wanda POS uses to be able to perform accounting operations.

e. Wanda Documentation

The documentation of Wanda POS comprises the documents listed below

- ❖ Wanda POS Installation Guide
- ❖ Wanda POS User's Guide
- ❖ Wanda POS Administrator's Guide
- ❖ Wanda POS Implementer's Guide
- ❖ Wanda POS Quick Start Guide

Installation Process

NB: This installation process is for the Windows Operating System. Other platforms will be included subsequently.

Installing Wanda POS is very simple. However, we do not want to make assumptions. So, we'll take you through the process step by step. Assuming you have already acquired the software let's get started.

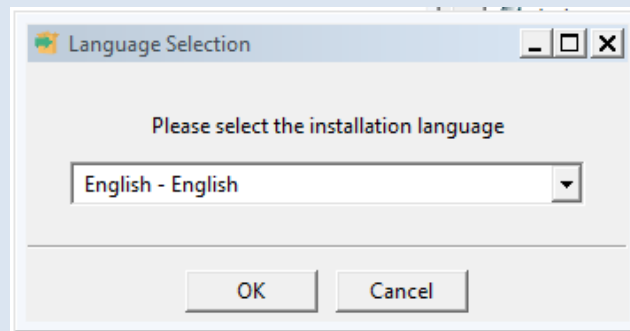

1. Open windows explorer and navigate to the directory in which you saved the installer.

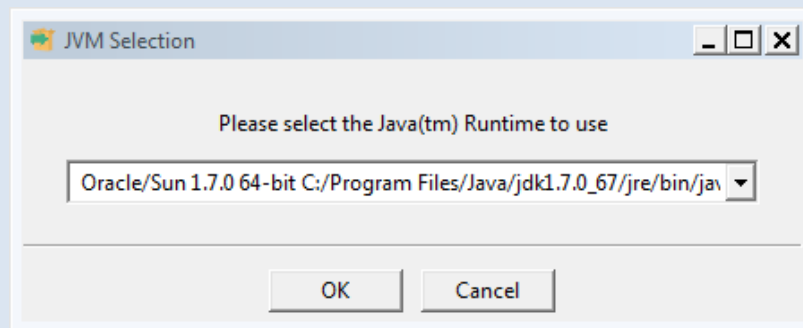

2. Right-click on the installer and 'Run as administrator'
3. The Wanda POS logo is displayed on the screen while the contents of the installer are loaded.

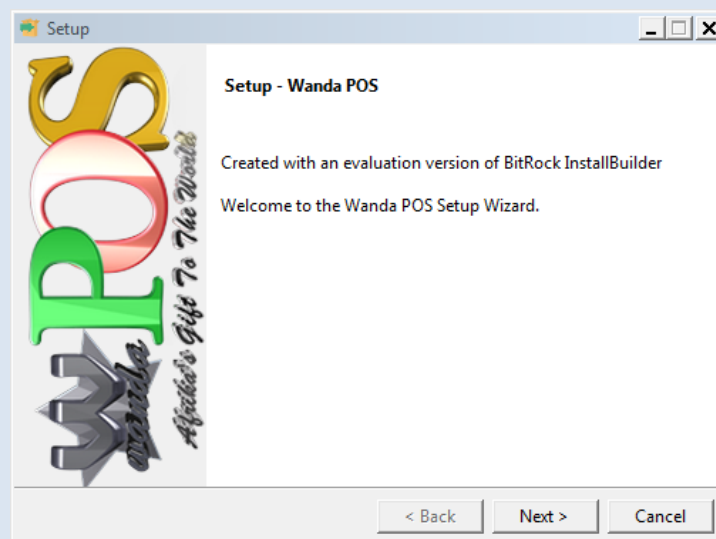

4. A pop-up window is displayed prompting for a language selection. Select the language you are most comfortable with and click on **OK**.

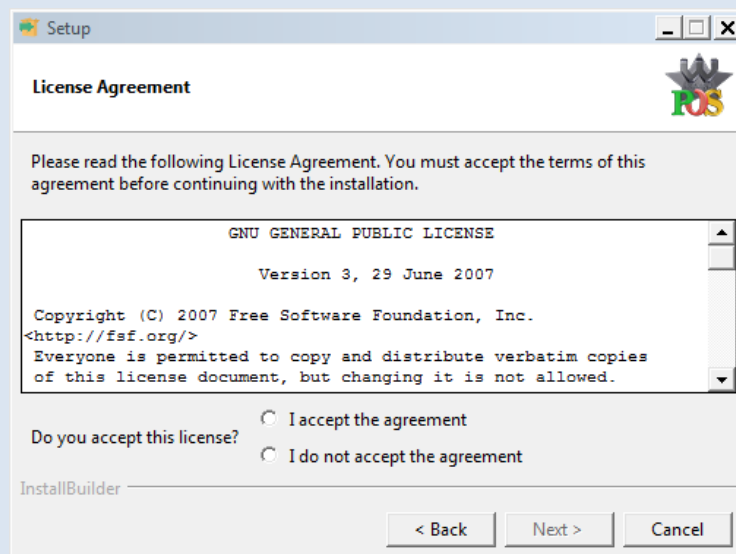

5. On the next window select the Java Runtime you want to use, then click on **OK**. If you have any doubts just click on **OK** and move on.

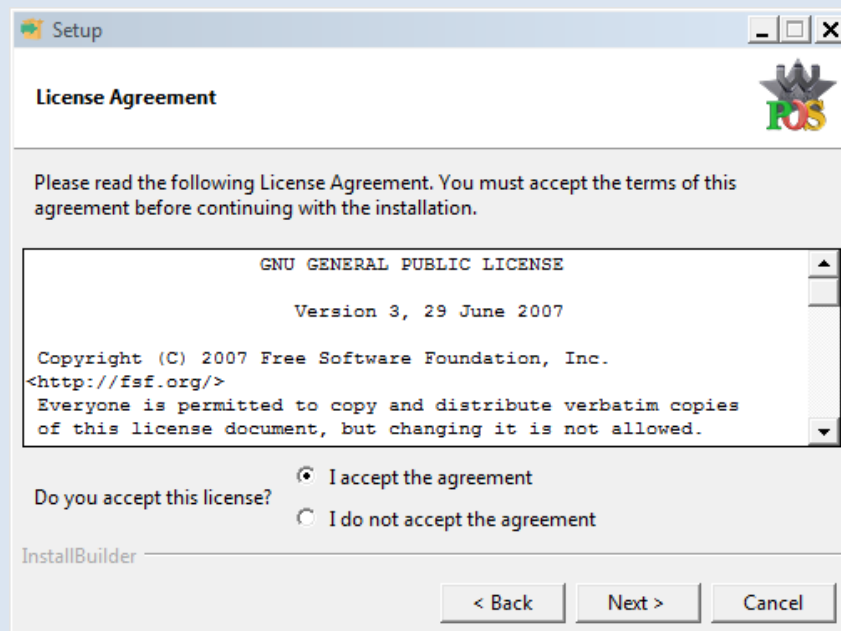

6. The next window gives you information about the install builder. You don't need to worry about this. Just click on **Next**.

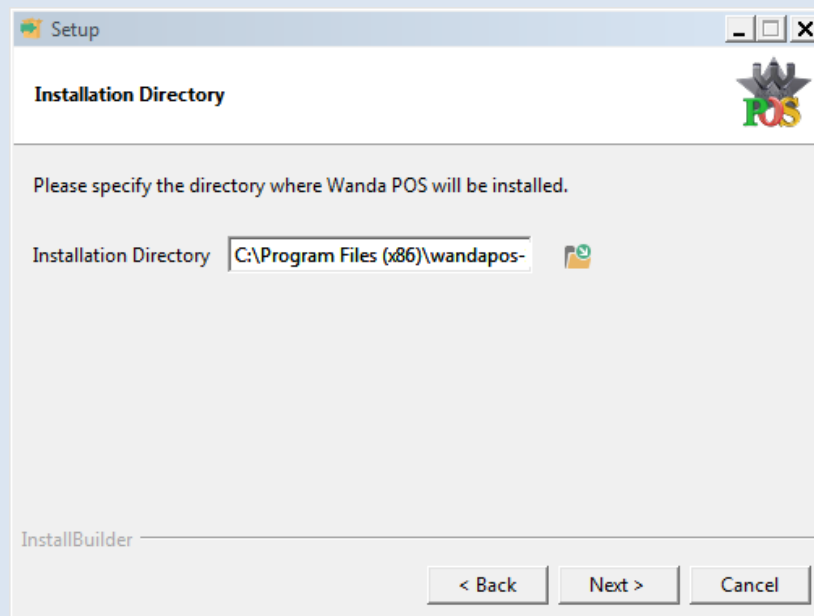

7. The next window is the License Agreement. The **Next** button is grayed out to inform you that you have to read the terms of the agreement before you proceed.

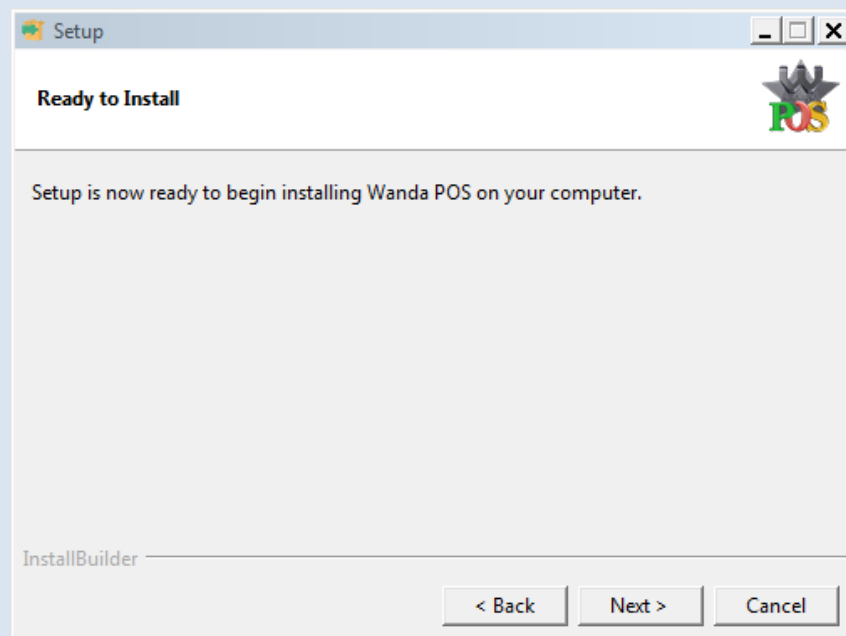

8. Once you've read the terms of the license agreement click on the radio button labeled '*I accept the license agreement*' and click on **Next** to proceed.

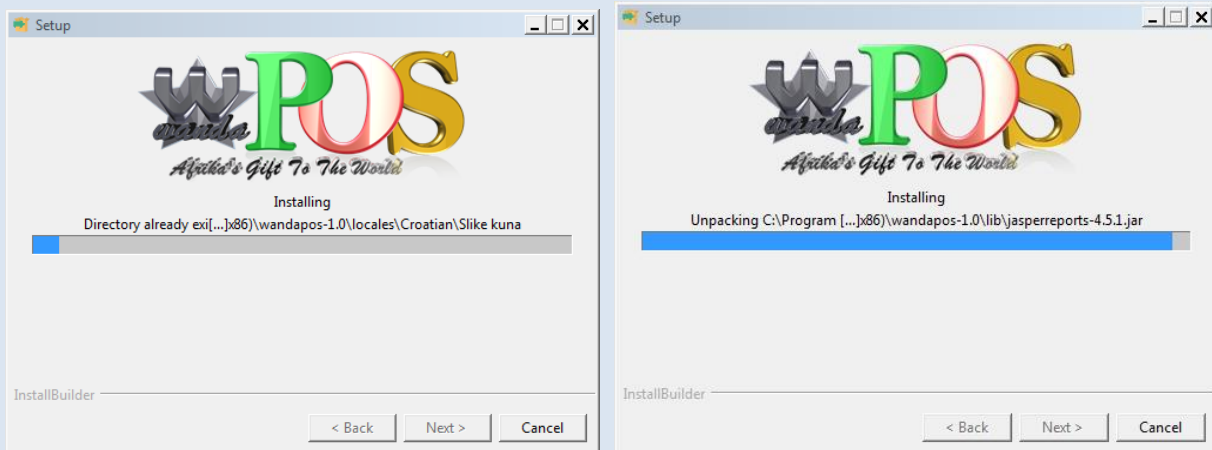

9. If you don't accept the terms of the agreement click on the radio button labeled '*I do not accept the agreement*' and exit the installation.
10. Next you have to select the installation path. We recommend you just allow the default installation path and click on **Next**. However, if you have a good reason to change to installation path, select a different path and click on **Next**.

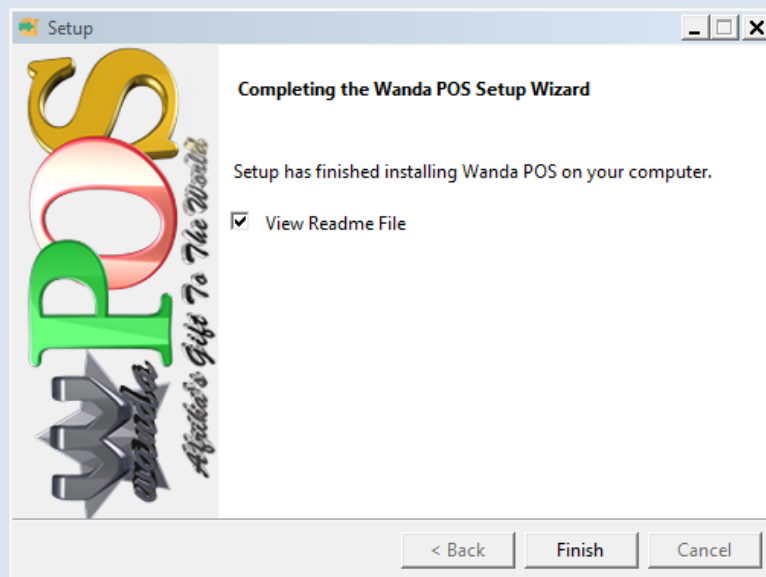

11. Now that you have setup everything needed you're ready to install. Click on **Next** to start the installation.

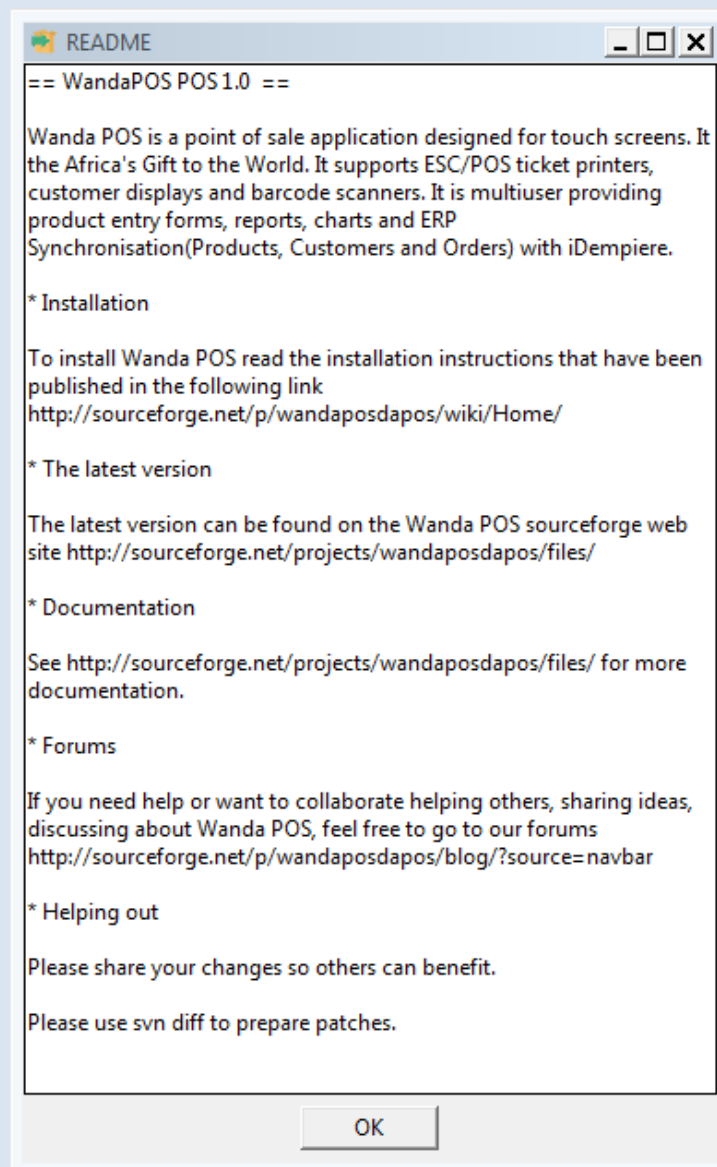

12. While the setup is performing the installation. The progress bar tells you how far you've gone with the installation.

13. Once you're done the next window leads you to the 'readme' file. Feel free to uncheck this option before clicking on **Finish**. However, we encourage you to leave this option checked.

14. If you didn't uncheck the readme option you'll see a window similar to the one below. Once you're done reading, click on **OK** to exit that window.

Thanks for reading.

Brought to you by the Wanda POS development team. We look forward to getting feedback from you.
